

Hicks' New Patent View Finders FOR CAMERAS.

Acknowledged by experts to be a Wonderful Improvement. The View Finder and Level are now combined with the happiest result, as, both being in such proximity, the Camera can be adjusted in half the time and with greater accuracy. Each Finder is beautifully finished, and guaranteed by the maker.

NO CAMERA COMPLETE WITHOUT IT.

No. 1 View Finder.

With square body and round convex lens; also circular bubble, very sensitive, having the under side of upper glass ground.

No. 3 View Finder.

This is similar to No. 1, but of larger size. It is equally sensitive, but is more appropriate for large Cameras.

No. 5 View Finder.

With circular body, and square concave lens; ground bubble; very sensitive.

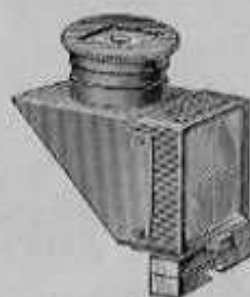

No. 7 View Finder.

Is similar to No. 5, but has a circular instead of a square lens. It is equally sensitive, and will be found a very handy and portable instrument.

No. 2 View Finder.

With square body, and square concave lens. The glasses of the circular bubble are ground and polished bright so as to give a brilliant field. Very sensitive.

No. 4 View Finder.

This is similar to No. 1, but has a circular body, and the lens project a little, remarkably neat pattern, with very sensitive bubble.

No. 6 View Finder.

Is similar to No. 2, except in the bubble, which in this pattern is placed almost flat on the roof instead of being raised in cell. It is exceedingly compact and sensitive.

No. 8 View Finder.

With square body (length $1\frac{1}{4}$ in., depth $1\frac{1}{2}$, breadth $1\frac{1}{2}$) and square concave lens. The glasses of the circular bubble are ground and polished bright so as to give a brilliant field. Extremely sensitive.

Prices of Nos. 1, 3, 4 and 7, with round convex lens each 10/-

.. .. 2, 5 and 6, with square concave lens .. 12/-

.. .. 8, with square concave lens 14/-

NOTE.

If made of Aluminium, 2/- each extra.
